

## ESI Eurosilo profile - Covered circular storage

ESI Eurosilo is an independent Dutch company that specializes in the turnkey delivery of silo-system storage facilities for non-free-flowing bulk solids. The Eurosilo's mammoth silos are capable of handling and storing a wide variety of bulk solids, including coal, FGD gypsum, limestone and many, many other types of materials. And, because ESI Eurosilo has no ties with any manufacturing facility, we can largely accommodate your preferences for vendors or local supplies.
